# The Tow and Collect is the ideal tool for cleaning goose poop from your parks, lake sides, fields and play areas.

**Eliminate  
Goose Poop**

**Sweeps Leaves  
& Debris**

**For Safe &  
Clean Parks**

**Easy to  
Use**

**Save on Time  
& Labor**

**Industrial Grade  
Construction**

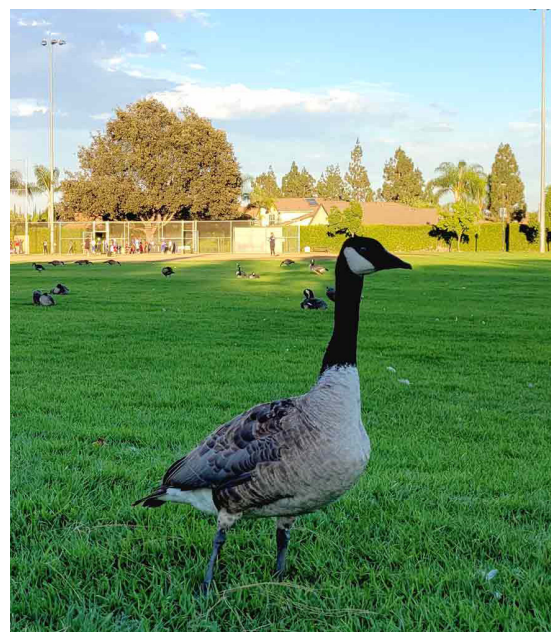

Parks in metropolitan areas with waterways nearby can often suffer from an influx of geese and the problem of goose droppings. It is a common issue in parks around the world.

Not only are goose droppings unsightly and unpleasant, but they are also packed full of nasty bacteria that can lead to serious illness in humans. Therefore, removing the goose poop is a health and safety precaution for your residents and visitors.

The Tow and Collect makes quick work of collecting goose poop from the grounds, it's easy to operate and highly effective.

Over many years the Tow and Collect has been used to collect goose droppings from around parks, fields and lakes. We have supplied many of the machines into municipalities and organizations responsible for parks for the very purpose of picking up and cleaning up goose poop.

Goose droppings, poop, excrement, faeces, manure, need not be the problem it can be! With the Tow and Collect these unsightly and unpleasant droppings are easy to pick up leaving athletic fields, sports fields, parks and lake sides clean and tidy and most importantly safe for people to enjoy every single day.

## HOW DOES IT WORK?

# Take the labor out of goose poop collection.

We know that cleaning up goose poop is often laborious – but it doesn't have to be. Thanks to its ease of use, the Tow and Collect makes it simpler than ever before.

**Save time, effort & labor costs the smart way.**

The Tow and Collect works by sweeping up manure and debris into the catcher, as you tow it. It uses nylon brushes, which counter-rotate from the direction of travel. Our two smaller models, the Mini 700 and 1220, are ground driven where as, the 1500 Pro and our new model the 1500 Pro E use a Kohler engine to power the brushes.

You simply drive over the droppings and the Tow and Collect will sweep them up for you. Once the large capacity catcher is full, take it to your dumping spot and with its easy-to-empty hopper, you'll dispose of the collection in no time.

## Our range of models

	Mini 700	1220	1500 Pro	1500 Pro E
<b>Collection Width</b>	28 inches	48 inches	59 inches	59 inches
<b>Collection Capacity</b>	84 gallons	132 gallons	165 gallons	165 gallons
<b>Brush Drive System</b>	Chain Drive from Wheel Traction	Chain Drive from Wheel Traction	2:1 Reduction Gearbox with Clutch	2:1 Reduction Gearbox with Clutch

<b>Electric Key Start</b>	N/A	N/A	Yes - with Pull Start	Yes - with Remote Start
<b>Other</b>				Wireless Remote Functions

## PRODUCT FEATURES

**Ground Driven or Motorized Options:** The Mini 700 & 1220 have ground driven brushes or the 1500 Pro & 1500 Pro E have a Kohler engine to power the brushes.

**Height adjuster:** to suit different terrain and grass lengths.

**Large Capacity Catcher:** allows you to collect a good quantity before you need to empty.

**Tow with your existing UTV:** using the simple ball-hitch coupling.

**Adjustable draw-bar:** to suit ground conditions, grass length and tow-ball height

**Width Options:** Choose from three width options: 28", 48" or 59" - the wider the model, the faster the collecting.

**Great for the grounds:** Spring mounted tines to help break up droppings and debris, for the brushes to sweep up.

**Easy open:** Gas assisted catcher with easy-to-wind handle on side of machine.

**Servicing & Spare Parts:** Built to last with serviceable and replaceable parts. Purchase via our website.

Introducing the

## BENEFITS

# The perfect park companion

### **Efficient**

Maximize your productivity with a tool that quickly and efficiently sweeps up goose poop and debris, allowing you to cover large areas in a fraction of the time compared to manual methods.

### **A Smart Investment**

Reduce labor costs and equipment wear by investing in a reliable machine that handles tough jobs with minimal maintenance, saving you money in the long run.

### **Quality Construction**

The machine is constructed with 8 gauge, high grade steel. We pretreat all parts with a 7 stage process that finishes with an Oxsilan® coating – a high performance & eco-friendly alternative to the traditional zinc phosphating process for long term corrosion resistance and paint adhesion. The catcher is made from UV resistant plastic.

### **Effective**

Achieve a thorough cleanup that removes not only unsightly goose droppings but also leaves fields free of other debris, ensuring a pristine environment.

### **Durable**

We built the Tow and Collect with durability and ease of use in mind. Made to withstand the demands of daily use and be with you for the long haul. Parts can be serviced and replaced.

### **Happier Staff**

“Makes an undesirable job, more desirable!”. We often hear from our users that the Tow and Collect makes the process of collecting goose poop drastically more bearable and even enjoyable. It’s so easy to use, especially in comparison to their previous methods.

### **Safe & Clean Parks**

Protect your community by reducing exposure to harmful bacteria found in goose droppings and other debris, promoting a safer & cleaner environment for all users.

### **Less Complaints**

Enhance visitor satisfaction by keeping your parks and fields clean of goose droppings. You’ll reduce complaints and make your green spaces more enjoyable for everyone.

### **Enviro & Animal Friendly**

Maintain your grounds in an environmentally and animal friendly way with a machine that reduces the need for costly or inhumane alternatives to goose poop management.

### **Small Lead Times**

We endeavor to carry stock of all models in our Georgia based warehouse, and dispatch stock within 2 working days of your order being processed.

## The smart way to clean your grounds.

Tow and Collect's range of premium grounds cleaners make it possible to clean up goose poop without the time-consuming and costly physical labor.

Paul Elliot maintains a 15 acre municipal park on the edge of Lake Simcoe in Ontario, Canada. He's found the **Tow and Collect Mini 700** to be an effective and high-quality tool for cleaning up the goose manure in his park.

"People from surrounding cities, like Toronto, make specific drives up here to be at the park. Because **they have found the city to be so dirty with Goose Poop and up here so clean** they're willing to make the drive of an hour or so"

He enjoys it's ease of use and simplicity, commenting that **"opening and closing the collector bin for collection disposal is extremely simple and extremely fast!"**

"When I switched over to the Tow and Collect Mini 700 **the amount of time that was spent was reduced drastically from about 8 hours down to 2 and a half** & I felt a whole lot better after the 2.5 hours in the sun versus the 8 hours in the sun!"

"People don't mind the geese, just not what they leave behind. **Only one complaint since purchasing the Tow and Collect, usually 25-30 complaints a season!"**

"**We're saving \$50-\$60 per day [in staff resource]** – By the end of 2 summers it would have paid for itself in those savings"

Tow and Collect 1220 User  
- Michigan

"The sweeper is a nice bomb-proof piece of machinery. It kind of **sold itself in terms of its rigor and quality.** Workers pull it out of a garage a couple of times a week, hook it to a tractor, and an hour later the fields are squeaky clean. **It's very effective and efficient in removing the poop"**

Edward F - Boston

If you'd like to talk to someone in your industry and/or area about their experience and advice on using the Tow and Collect, please reach out and we will happily arrange this for you.

**"This is by far the fastest, the easiest and quickest way to get the job done and get it done completely right."**

**Watch the interview here**

<https://bit.ly/goosepoop>

"So I'm totally convinced **this is the way to clean up the sports fields throughout Canada.** I mean, I think it's wonderful."

Mike Hicks - Canada

"We have been using this machine for a few months now and it works great. **It picks up all of the goose poop very well and quickly.** Kudos to the team for making a great piece of equipment."

Steven S - California
