Easy to operate & easy to maintain

TOW AND COLLECT

Mini 700

The Tow and Collect Mini 700 offers a powerful yet compact solution for small to medium-sized properties. Perfect for collecting horse manure, alpaca manure, goose poop, and even small debris like treenuts, the Mini 700 saves you hours of backbreaking work.

With no engine, the Mini 700 is designed for simplicity, using its wheels to drive counter-rotating nylon brushes that sweep debris into the rear-mounted catcher as you drive. The 27-inch wide pick-up path and 84-gallon catcher capacity allows you to collect up to two wheelbarrow loads before needing to unload.

Emptying the catcher is a breeze with a gas-assisted opening mechanism, controlled by a handle located on the side of the machine. Simply reverse to your dumping area and release.

Despite its small size, the Mini 700 is up to 5x faster than traditional vacuum systems and more effective than blade style or spot cleaning tools, eliminating the need for frequent stops, struggling with heavy scoops or manually lifting manure.

The Mini 700 is your go-to solution for effortless, efficient pasture cleaning.

5x faster than a paddock vac!

27 inch Collection Width
Suitable for pastures with rougher terrain.

84 Gallon Capacity
Or approximately 2 wheelbarrow loads - great for smaller 1-5 horse properties.

Ground Driven Brush Drive System
No engine makes for simple use and low maintenance.

Specs

Collection Width	27 inches
Collection Capacity	84 gallons
Brush Drive System	Chain Drive From Wheel Traction
Engine Model	N/A
Fuel	N/A
Electric Start	N/A

Assembled Size (LxWxH)	85" x 52" x 39" (7'1" x 4'4" x 3'3")
Crated Size (LxWxH)	57" x 43" x 43" (4'9" x 3'7" x 3'7")
Assembled Weight	340 lbs
Crated Weight	410 lbs
Tow Coupling	Universal Coupling Fits 1" 7/8, 50mm & 2"
Jockey Wheel	Optional Extra

Features

1. Great Capacity
84 gallon catcher means you collect at least 2 wheelbarrows of manure/debris before you have to empty.

2. Adjustable Height
Adjustable height to suit the ground conditions and grass length. The Mini 700 is most effective when the grass is less than 4 inches long.

3. Easy to Empty Catcher
Gas-assisted catcher emptied by easy-to-wind handle on side of machine.

4. Adjustable Draw Bar
Adjustable draw-bar to suit ground conditions, grass length and tow-ball height.

5. Tow with an ATV or Side by Side
Simple ball-hitch coupling that suits most tow vehicles.

6. Spring Mounted Tines
Help to break up manure and remove thatch - located behind the deflector skirt.

7. Ground Driven + No Engine
1/2" chain drives from the wheel to make the brushes counter-rotate and flick the manure debris into the plastic catcher. No engine means no fuel required and minimal maintenance.

8. Built to Last
Designed and manufactured for the toughest conditions, Tow and Collect is built to be with you for the long haul. It's serviceable and has replaceable spare parts available. Service videos can be accessed via QR codes found on the machine or via our website.

Simplicity meets efficiency

TOW AND COLLECT

1220

For larger properties, the Tow and Collect 1220 provides the perfect balance of power and simplicity, offering efficient manure and debris collection without the need for an engine.

Like its smaller counterpart, the 1220 operates without an engine, making it easy to use and maintain, while the nylon brushes sweep debris into the catcher as you tow it along. The 4-foot wide pickup and 132-gallon catcher allow for approximately five wheelbarrow loads before requiring emptying.

The 1220 works 8x faster than traditional vacuum systems, with no need to stop and start at every pile. It's ground-driven sweeping action makes it possible to drive over debris, collecting it efficiently as you move. Gas-assisted opening of the catcher, controlled by a side handle, makes disposal effortless, keeping pasture care quick and convenient.

The Tow and Collect also helps remove thatch and dead grass, promoting healthier pasture conditions. With its industrial-grade construction and focus on simplicity, the 1220 is built to withstand regular use, ensuring a long-lasting and reliable solution for property maintenance.

8x faster than a paddock vac!

48 inch Collection Width
Great for medium sized farms with flat pastures & debris pick up from large areas.

132 Gallon Capacity
Or approximately 5 wheelbarrow loads - ideal for 4-12 horse properties.

Ground Driven Brush Drive System
No engine makes for simple use and low maintenance.

Maximum power and capacity

TOW AND COLLECT

1500 Pro

For those managing larger pastures or properties, the Tow and Collect 1500 Pro delivers unmatched productivity and power.

The 1500 Pro features a heavy duty Kohler 4-stroke petrol engine which means the brushes constantly rotate, no matter what speed you choose to drive. The 1500 Pro can be towed at up to 8MPH depending on terrain and grass length, covering large areas quickly.

With a 5-foot wide pick-up path and a massive 160-gallon catcher, you can collect up to seven wheelbarrow loads of horse manure, goose poop, or debris before needing to empty.

The gas-assisted hopper ensures easy dumping with minimal effort. Simply reverse to your dumping area, open the catcher, and release the load. This model is designed for serious efficiency, covering a half-acre in just over 10 minutes—far surpassing the speed of traditional vacuum systems that require constant stops.

In addition to cleaning up waste, the 1500 Pro also promotes healthy pasture regrowth by clearing thatch and dead grass. Built to endure, the 1500 Pro is the go-to solution for professional-grade pasture maintenance.

Cover 1/2 an acre in 10 minutes!

59 inch Collection Width

Great for larger pastures, properties & parks - covers large areas quickly and effectively.

160 Gallon Capacity

Or approximately 7 wheelbarrow loads - ideal for those needing a large collection capacity.

Engine Driven Brush Drive System

The powerful engine keeps the brushes rotating regardless of towing speed.

Specs

Collection Width	59 inches
Collection Capacity	160 gallons
Brush Drive System	2:1 Reduction Gearbox with Clutch
Engine Model	Kohler CH270 - 7hp
Fuel	4-stroke, 91 octane
Electric Start	Yes - Key & Pull Start

Assembled Size (LxWxH)	88.6" x 79.1" x 35.4" (7'5" x 6'7" x 2'11")
Crated Size (LxWxH)	57" x 80" x 27" (4'9" x 6'8" x 2'3")
Assembled Weight	540 lbs
Crated Weight	720 lbs
Tow Coupling	Universal Coupling Fits 1"7/8, 50mm & 2"
Jockey Wheel	Optional Extra

Features

1. Adjustable Height

Adjustable height to suit the ground conditions and grass length. The 1500 Pro is most effective when the grass is less than 5" long.

2. Constant Brush Drive

A 7hp Kohler engine coupled with a 2:1 reduction gearbox and clutch rotates the brushes at a constant speed regardless of what forward speed is being achieved.

3. Adjustable Draw Bar

Adjustable draw-bar to suit ground conditions, grass length and tow-ball height.

4. Tow with an ATV or Side by Side

Simple ball-hitch coupling that suits most tow vehicles.

5. Spring Mounted Tines

Help to break up manure and remove thatch.

6. Built to Last

Designed and manufactured for the toughest conditions, Tow and Collect is built to be with you for the long haul. It's serviceable and has replaceable spare parts available. Service videos can be accessed via QR codes found on the machine or via our website.

7. Large Capacity Catcher

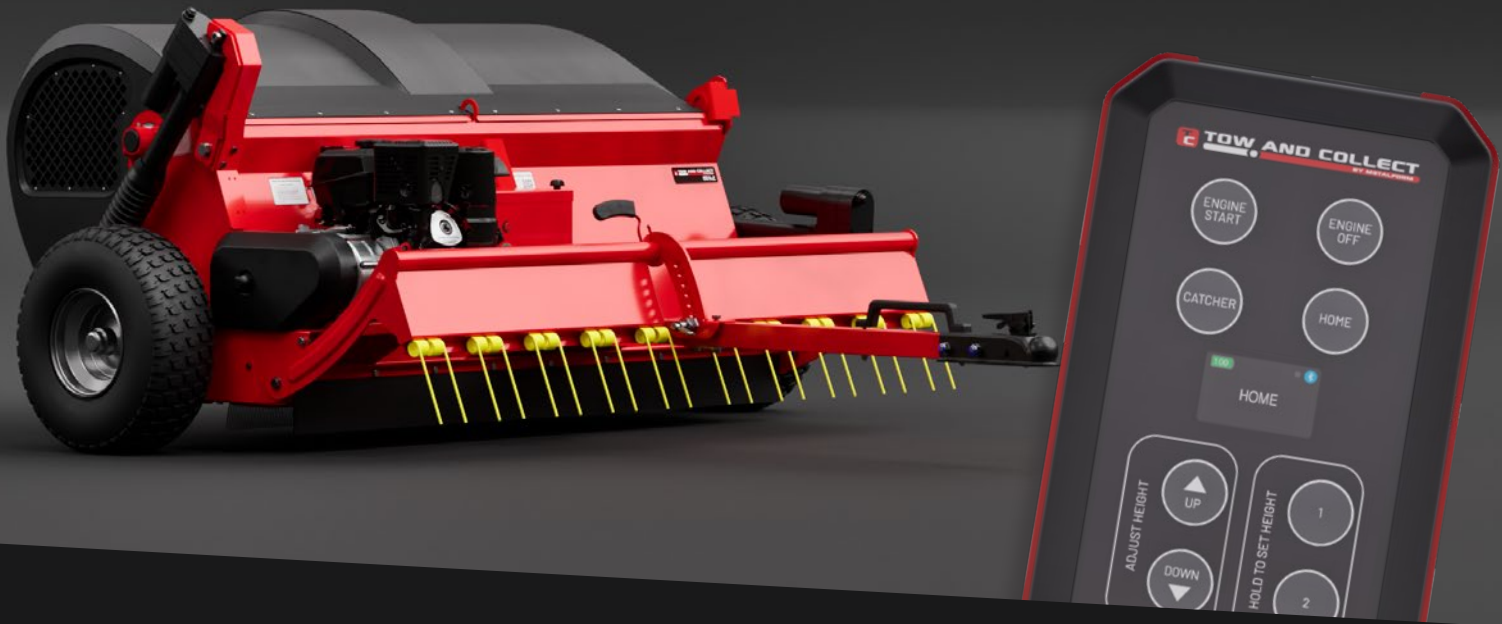

160 gallon catcher means you collect approx 7 wheelbarrows of manure/debris before you have to empty.

8. Easy to Empty Catcher

Gas-assisted catcher emptied by easy-to-wind handle on side of machine.

The latest innovation in pasture cleaning

TOW AND COLLECT
1500 Pro E

The Tow and Collect 1500 Pro E sets a new benchmark in pasture maintenance with its innovative remote control functionality. This model offers unmatched convenience by allowing you to operate the machine from your tow vehicle, with features like remote start/off engine control, brush height adjustment, and catcher open/close functions. The 1500 Pro E eliminates the need for manual intervention, letting you focus on getting the job done quickly and efficiently.

The 1500 Pro E features a powerful 7hp Kohler engine and a wide 5-foot pick-up path. Capable of holding up to 7 wheelbarrow loads in its 160-gallon hopper, the 1500 Pro E can cover half an acre in just over 10 minutes. The remote-controlled height adjustment makes switching between collection and travel modes easy, allowing you to transition between tasks without leaving your seat.

Durability is at the core of the Tow and Collect brand, and the 1500 Pro E is no exception. Constructed from 8-gauge high-grade steel and treated with a 7-stage powder coating process, this machine is built to withstand the demands of daily use. Experience the ultimate in pasture cleaning technology with the Tow and Collect 1500 Pro E.

The 1500 Pro E takes the original 1500 Pro to the next level with remote controlled functions!

59 inch Collection Width
Great for larger pastures, properties & parks - covering half an acre in just over 10 minutes.

160 Gallon Capacity
Or approximately 7 wheelbarrow loads + hands free dumping with remote controlled catcher operation.

Engine Driven Brush Drive System
Remote controlled engine 'start' and 'off' function for maximum efficiency and minimal manual interaction.

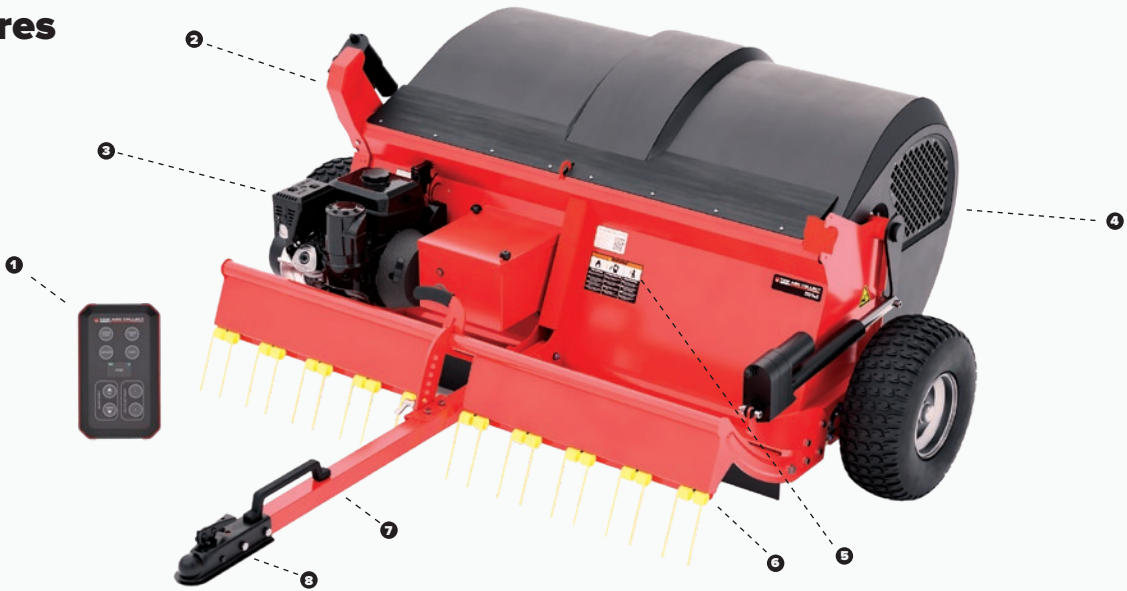

Specs

Collection Width	59 inches
Collection Capacity	160 gallons
Brush Drive System	2:1 Reduction Gearbox with Clutch
Engine Model	Kohler CH270 - 7hp
Fuel	4-stroke, 91 octane
Electric Start	Wireless Remote or Pull Start

Assembled Size (LxWxH)	94.5" x 79" x 36" (7'10" x 6'7" x 3')
Crated Size (LxWxH)	57" x 80" x 27" (4'9" x 6'8" x 2'3")
Assembled Weight	610 lbs
Crated Weight	795 lbs
Tow Coupling	Universal Coupling fits 1 7/8", 50mm & 2"
Jockey Wheel	Optional Extra

Features

1. Remotely Operate from your Tow Vehicle
Operate the Tow and Collect from the comfort of your tow vehicle with our new bluetooth remote. It features a Lithium Polymer battery with 48 hours run time & USB-C charging.

2. Remote Adjustable Height
Remotely adjust the height level of your brushes with, 11 height stages and 2 preset options. Making it quick and easy to change between the brush height for required collection and moving the brush height up for transit.

3. Remote Engine Stop & Start
Reduce time spent getting out to start and stop the 7hp Kohler engine that runs the brushes, with remote controlled engine 'start' and 'off' functionality. The Kohler engine coupled with a 2:1 reduction gearbox and clutch rotates the brushes at a constant speed regardless of what forward speed is being achieved.

4. Remote Open & Close Catcher
Manage the opening and closing of the 160-gallon capacity catcher with the remote, simply arrive at your dumping site and press the CATCHER button on your remote control.

5. Built to Last
Designed and manufactured for the toughest conditions. It's serviceable & has replaceable spare parts available. Service videos can be accessed via QR codes found on the machine.

6. Spring Mounted Tines
Help to break up manure and remove thatch.

7. Adjustable Draw Bar
Adjustable draw-bar to suit ground conditions, grass length and tow-ball height.

8. Tow with an ATV or Side by Side
Ball-hitch coupling that suits most tow vehicles.

The Tow and Collect is in use across a range of properties throughout North America.

Use the Tow and Collect for...

HORSE MANURE PICK UP

GOOSE POOP PICK UP

CLAY BIRD PICK UP

ALPACA MANURE PICK UP

LEAVES, DEBRIS, NUTS, PINECONES

Horse Manure Collection

Keep your horses healthy and your paddocks pristine.

Managing horse manure can be exhausting and time-consuming, but the Tow and Collect makes it easy. By quickly collecting manure, the machine helps maintain cleaner paddocks, reduces parasite, and promotes healthier pastures. With less manual labor, you'll have more time to enjoy what matters most.

Goose Poop Pickup

The most efficient way to clean your grounds.

Goose droppings are not only unsightly but also a health hazard. The Tow and Collect ensures a clean and safe environment by efficiently removing goose poop from parks, lakesides, and fields. Its ease of operation saves both time, labor and therefor costs, while creating a cleaner and safer environment for visitors and residents alike.

Clay Bird Pick Up

Fast, efficient clay target cleanup.

Cleaning up clay bird fragments from shooting ranges is a time-consuming task. With the Tow and Collect, you can effortlessly clear shotgun debris and clay bird fragments, maintaining pristine shooting grounds with minimal effort. This makes the post-shoot cleanup quicker, easier, and more eco-friendly, saving you time and labor while keeping your range in top condition.

Alpaca Manure Pickup

Quick, easy, and efficient alpaca manure collection.

Alpacas often defecate in communal areas, making manure collection straightforward. The Tow and Collect simplifies this even further, allowing you to gather 'alpaca beans' quickly and easily. Whether you use it as a fertilizer or for resale, the machine makes it easy to keep your paddocks clean while benefiting from the manure's rich nutrients.

Leaves, Debris, Nuts and Pinecones

Keep your property debris-free, effortlessly.

The Tow and Collect isn't just for manure—it also excels at picking up leaves, tree nuts, pinecones, and other debris. It's a versatile machine that saves you hours of manual raking and cleanup, keeping your property looking neat and tidy with minimal effort. Suitable for a range of properties, it's the ultimate tool for year-round ground maintenance.

"It's been a
GAME CHANGER
for me."

TOW AND COLLECT

User Stories

Real Testimonials by Real Users

Tow and Collect - 1220
Laina Firestone - Georgia, USA
Used for: Horse Manure Collection

Laina was manually mucking in her two main paddocks, this was time-consuming and taking up to two hours. "Now with the Tow and Collect I can just do it once a day in an hour."

"The best thing about owning a Tow and Collect is that it saves me time, it keeps my pastures hygienic and it will help with flies, smell, aesthetics & parasites. All things that are very important to me and the **Tow and Collect is going to make that job so much easier for me.**"

Tow and Collect - All Models
Ed Dabney - Georgia, USA
Used for: Horse Manure Collection

"We use our machines hard but the Tow & Collect machines have held up very well due to the top quality design and steel construction."

"The **Tow & Collect machines are so easy to use** and have greatly reduced our labor time while keeping all our paddocks and pastures looking beautiful. By removing the manure, we have reduced our fly and parasite problems. Our grass is much healthier also by dethatching. Our pasture looks like a golf course!"

"I really love these and highly recommend them."

Tow and Collect - 1500 Pro
Grand Blanc Huntsman's Club - Grand Blanc Michigan
Used for: Clay Bird and Shotgun Wad Debris

"Our hand manual way of doing things was becoming more and more difficult as our volunteer group ages, so we needed a machine! So thanks to the effort of Brigitte and the references she gave, we decided to make the investment a year ago. And its really been a blessing, its really helped us a great deal."

"**The biggest benefit is the time saving. Less labor. An easier way to do it.** Its worth its price just in the time saving alone. It does a nicer job than you can do by hand. We just use the Tow and Collect to sweep it up, dump the pile in a convenient spot, to where we can scoop it up with a bucket on the tractor and take it to our dumping area."

"**The simplicity, and the time saving, and the labor savings is immeasurable.**"

Tow and Collect - Mini 700
Mike and Joan - Florida, USA
Used for: Horse Manure Collection

"**Having the Tow and Collect has changed my life dramatically** - The Tow and Collect has saved probably 95% of manure management. I have amazing grass now because the Tow and Collect not only picks up the manure, it pulverizes it and grabs the other debris, so its a fantastic solution for soil management."

State Parks & Municipalities
Used throughout USA & CA for Goose Droppings & Debris Collection in Parks

"People don't mind the geese, just not what they leave behind. Only one complaint since purchasing the Tow and Collect, usually 25-30 complaints a season!" - Anon State Park.

"We're saving \$50-\$60 per day [in staff resource] - By the end of 2 summers it would have paid for itself in those savings" - Anon State Park.

"So I'm totally convinced this is the way to clean up the sports fields throughout Canada. I mean, I think it's wonderful." - Mike Hicks, CA.

Tow and Collect - 1500 Pro & Pro E
Paul and Pam - Pennsylvania, USA
Used for: Alpaca Manure Collection

Pam and Paul, run Bent Limb Farm outside of Redding, Pennsylvania, where they have raised alpacas and other animals since 2011. The challenge of manure management led them to use a pasture vacuum, which proved inefficient. This prompted Paul to research solutions, ultimately discovering the Tow and Collect, which Pam received as a Christmas gift in 2015.

"**It was the best Christmas present I've ever gotten. What took three hours to do by hand and about an hour and a half with the old machine now takes just 17 minutes!**"

Built to last

Tow and Collect's range of premium grounds cleaners are built with durability in mind. Made to withstand the demands of daily use and be with you for the long haul.

Industrial Grade Construction

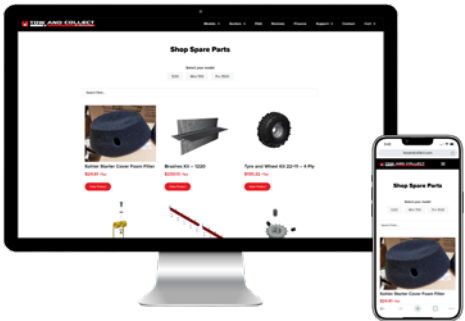

The Tow and Collect is constructed with 8 gauge, high grade steel and pre-treated with a 7 stage process that finishes with an Oxsilan® coating for long term corrosion resistance and paint adhesion. The UV-resistant plastic catcher ensures durability against sun exposure, making it a machine that stands the test of time.

Serviceable

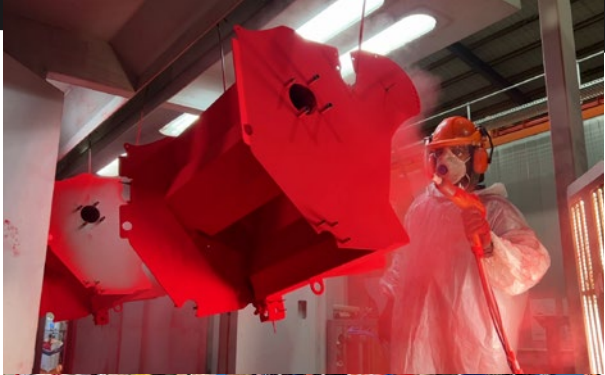

Keep your Tow and Collect running smoothly with regular maintenance. Access step-by-step service videos via QR codes on the machine or our website. Routine care is quick, easy, and ensures your machine stays in top condition for years of use.

Replaceable Parts

We offer a range of replaceable parts that can be ordered directly from our website, and some components are even available off the shelf. Whether it's brushes, wheels, or other components, we've got you covered for quick and easy replacements.

Spare parts available via our website.

FAQs

At Tow and Collect, we're here to make your life easier, whether it's cleaning your pasture or ensuring you have complete confidence in your purchase.

How does the Tow and Collect work?
The Tow and Collect uses counter-rotating nylon brushes powered by either the motion of your towing vehicle or an engine, depending on the model. These brushes sweep manure, debris, or droppings into a rear-mounted catcher as you drive.

What is the difference between the models?
Our models vary in size, capacity, and features to suit different needs. The Mini 700 is compact and ground-driven, ideal for small properties and rougher pastures. The 1220 offers a wider pickup path and larger capacity for medium-sized farms. The 1500 Pro is powered by an engine and great for larger properties, and the 1500 Pro E adds remote control functionality for ultimate convenience and efficiency. Each model is designed to match the scale and complexity of your cleanup tasks.

What types of debris can the Tow and Collect pick up?
The Tow and Collect is designed to handle a variety of debris, including horse manure, goose droppings, alpaca manure, clay bird fragments, leaves, nuts, and pinecones.

What towing vehicles are compatible with the Tow and Collect?
Our machines can be towed by ATVs, UTVs, zero-turn mowers, and small tractors using a standard ball and hitch coupling system.

How easy is it to operate the Tow and Collect?
Very easy! Simply hitch it to your vehicle, adjust the settings, and start towing. Emptying is easy, with a gas-assisted opening mechanism, we guarantee it to be a one person job! The 1500 Pro E, makes operation even more convenient with remote control features.

How much time will I save?
With Tow and Collect, you can clean up to half an acre in as little as 10-25 minutes, depending on the model. Compared to manual labor or slower methods like vacuum machines, our machines can be up to 8x faster, saving you hours of work each week.

How much area can I clean with the Tow and Collect?
Depending on the model, you can clean up to half an acre in just 10-25 minutes, saving you hours of manual labor.

Do they work in long grass?
Ideally, the length of grass for the machines to be most effective is no more than 4 inches in height for the Mini 700 and 1220. 6 inches for the 1500 Pro. In longer areas you may have to make a couple of passes to clear the majority of manure. This is also dependent on the density of your pastures and grass type. The less dense, the longer grass it can handle.

Does it work on un-even terrain?
Depends how un-even! The Mini 700 is more suited to rougher conditions because of its off-road wheels and a narrower wheelbase. Gentle undulations are fine for all machines though. The brushes need to be able to reach the manure. Driving in different directions in your paddock will help combat undulations.

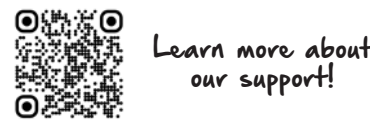

Does the Tow and Collect require a lot of maintenance?
Minimal maintenance is required. Regular cleaning and occasional servicing will keep your machine in top condition. We provide step-by-step maintenance videos accessible via QR codes on the machine or our website.

Can I replace worn-out parts?
Yes! We offer a full range of replaceable parts, including brushes and wheels, which can be ordered online or purchased off the shelf.

What if I'm not satisfied with my purchase?
We offer a 30-day money-back guarantee. If you're not completely satisfied, you can return the machine in its original condition for a full refund. T&Cs apply - see our website for full information.

How is the Tow and Collect delivered?
Machines are shipped in a large crate. If you don't have a forklift or tractor for unloading, a tail-lift delivery option is available for an additional fee.

Is the Tow and Collect covered by a warranty?
Yes, all Tow and Collect machines come with a 1-year parts warranty covering defects in materials and workmanship.

Learn more about our support!

**Take the labor out
of pasture cleaning.**
